home performance contracting network

BPI Course Descriptions:

Green Collar Crew (GCC) is committed to helping you become BPI certified and an expert in the developing home performance industry. BPI (Building Performance Institute) certification has become the leading industry standard for energy auditors and home performance contractors. Our courses prepare you well for the required written and field exams which are offered during the sessions (96% passing rate). We currently offer BPI accredited training for the Building Analyst and Envelope Professional certifications and will soon be offering Heating Professional certification. Courses include study guide, sample exam questions and field worksheets. Bring basic calculator and Windows based (no Macintosh) computer on written exam day. Please contact us for questions!

BPI Building Analyst (BA) & Envelope Professional (EP)

BA is an entry certification for becoming an energy auditor or trade professional; qualifies for many energy rebate programs. EP is a specialized certification for measuring shell performance and offering solutions; qualifies for BPI Company Accreditation (required for Home Star Gold Program). Students may register for either BA, EP or for a discounted Combination. BA students attend all sessions except Day 4 afternoon and Day 5 morning.

BPI Weatherization (WHALC)

Weatherization is an entry level certification for becoming an insulation and air sealing technician and will qualify you to implement these measures in the field in improve thermal comfort and energy efficiency. Learn by hands-on training on how to properly install insulation materials and air sealing techniques to improve air quality and tighten the building envelope to reduce energy loss.

Additional Course Descriptions:

Energy Auditing & Contracting Business Development – Learn how to develop your BPI certifications into business strategies from the initial diagnostic testing to weatherization & retrofitting, quality control, and project management. Designed to help you understand how the house works as a systems and how to advise your clients on a scope of work and retrofitting priorities. **Complimentary.**

EPA Lead Paint Renovator – Any person or company involved in retrofitting of buildings originally constructed prior to 1978 are now required by law to be EPA certified due to lead paint hazards before proceeding with renovations or face fines up to \$37,500 per day.
